

Interisland Livestock Shipping Standards | CATTLE

Shippers must present completed self-certifying shipping checklist to YB Harbor Agent with each shipment. HDOA DC-44 shall accompany each livestock shipment

Animals that are injured, obviously ill, unable to bear weight on all 4 limbs, are likely to give birth during transport, or those that have not been weaned and are traveling separate from the mother should not be transported. Aggressive animals should be transported separately. Animals are expected to be treated in a humane manner at all times. These rules and guidelines only pertain to Hawaii interisland transportation and do not pertain to interstate shipping.

	REQUIREMENTS	INITIAL
SHIPPING METHOD	Trailers, 20' containers, 40' containers, shipping crates. Must be structurally sound and without protruding objects that could injure animals. Must have four sided forklift pockets to ensure container cannot shift or tip off the fork lift during lifting.	_____
LEAK PROOF	All shipping trailers/containers shall be watertight up to a level of 5.5" Absorptive bedding and nonslip flooring is required.	_____
SIDES	Sides shall be solid up to the level of the animals' backs or window guards should be indented to prevent discharge.	_____
WINDOWS	Escape proof. Must contain entire animal. Tall enough to be above the backs of the animals or with 6" indented bars to prevent fecal discharge.	_____
ROOF	Must have a solid roof to protect from the sun, rain, and contain the animal entirely.	_____
WATER	Not required for trips < 24hrs; must have some form of watering system in case of transit delay. Please bring your own water when possible.	_____
FEED	Not required for trips < 24hrs.	_____
SPACE	*See table.	_____
TRAILERS DELIVERING LIVESTOCK	All livestock trailers entering into the harbor must be constructed to contain animal fecal matter and urine.	_____
TRANSFER AREA & STAGING AREA	In DOT designated area only. All staging areas must have water available.	_____
TRANSFER PROCESS (TRAILER TO CONTAINER)	Trailer with slide or inward opening gate abut to container with slide or inward opening gates (no greater than 6" space between).	_____
OR TRANSFER PROCESS (DOT CHUTE)	Secure chute gates to trailer and container, if DOT chute is available.	_____
SPILLAGE	All spillage must be cleaned up and removed from harbor. The shipper must bring shovel, broom, etc to clean area. All shipping containers that remain in the harbor must be cleaned out and material hauled away. A fine/fee will be imposed if spillage is not cleaned.	_____
